MEMORANDUM

TO: Emily Crawford, City Manager
FROM: Tim Littlejohn, Director of Planning & Development Services
ITEM: **12. Ordinance (First Reading) Z-2026-23: Receive a Report, Hold a Discussion and Take Action on a Request from The Owner to Change the Zoning of Approximately 99.38 Acres from Agricultural Open (AO) To a Planned Development District (PDD-199) to allow Residential Medium Density and Residential Single-family uses with amended standards. Located At 4489x Caldwell Road. *(Tim Littlejohn)***

GENERAL INFORMATION

The subject property was annexed into the City limits in 1980. The owner intends to allow Medium Density with alternative minimum size standards of 40 feet in width and 4,000 square feet in area to allow a mixture of single-family and duplexes. Additionally, within tract 2, they have proposed Residential Single-Family uses with minimum standard sizes of 50 feet in width and a minimum of 5,000 square foot lots.

Because the proposed rezoning from Agricultural Open (AO) to a Planned Development (PD) with base zoning of Medium Density Residential (MD) and Single-Family Residential (RS-6) will create more residential development, a super-majority vote is not required.

Request

Create a Planned Development District (PDD-199) to allow Medium Density and Residential Single-Family uses with specific standards.

Location

Located near the intersection of Neas Road and Caldwell Road.

Background

The subject property was annexed into the City limits in 1980. The owner intends to allow Medium Density with alternative minimum size standards of 40 feet in width and 4,000 square feet in area to allow a mixture of single-family and duplexes. Additionally, within tract 2 they have proposed Residential Single-Family uses with minimum standard sizes of 50 feet in width and a minimum of 5,000 square foot lots.

Zoning, Existing and Proposed Land Use

	Zoning	Existing Land Use
North	ETJ	Single-family/Agricultural
East	ETJ	Water Treatment
South	AO	Single-family
West	MH/PDD-177	Mobile/manufactured home/Single-family

Criteria Assessment

Section 1.4.1.4 of Abilene’s Land Development Code states that, in making a determination regarding a requested zoning change, the Planning and Zoning Commission and the City Council may consider the following factors:

- (1) **Whether the proposed zoning map amendment implements the policies of the adopted Comprehensive Plan, including the land use classification of the property on the Future Land Use and Development Plan Map, as amended.**
 The proposed use is consistent with the Comprehensive Plan.
- (2) **Whether the uses permitted by the proposed change in zoning classification and the standards applicable to such uses will be appropriate in the immediate area of the land to be reclassified.**

The proposed zoning would be appropriate as it would be consistent with the neighboring uses.

(3) Whether the proposed change is in accord with any existing or proposed plans for providing public schools, streets, water supply, sanitary sewers, and other public services and utilities to the area.

This property is unplatted and will need to plat prior to development can take place on this property. At that time utilities will be extended to the property.

(4) Any other factors, which will substantially affect the public health, safety, morals, or general welfare.

None known.

Planning and Zoning Commission Recommendation

The Planning and Zoning Commission recommends **approval**.

If opposed, please provide comments:

I have a home and reside in the yellow highlighted parcel # 996314. I'm requesting that parcel # 52891 remain as AO in order to provide a sufficient buffer area from my home. The existing transmission ROW (50133) will provide a good buffer line separating the planned development from my property, but parcel # 52891 is too close and hopefully too small for intended residential development. In regards to the cross hatched SW corner of parcel # 53007, I have always maintained that area and it's part of my property fence line. I'd request that area remain as AO.

Request

Change the zoning of approximately 1.21 acres from Residential Single Family (RS-12) to General Commercial (GC).

Location

Located on the Southwest Corner of ES 11th St and Oldham Ln. (Property ID: 19721)
 Legal description being approximately 1.21 Acres of Land Out of the Southeast 1/4 of Section 48, Blind Asylum Lands, City of Abilene, Taylor County, Texas.

Background

The subject property was annexed in 1959 and has remained vacant since. The applicant is looking to rezone to General Commercial (GC) to make the property more marketable.

Zoning, Existing and Proposed Land Use

	Zoning	Existing Land Use
North	GC	PARC
East	RS-12	Lytle Creek
South	RS-12	Residential
West	RS-6	Residential

Criteria Assessment

Section 1.4.1.4 of Abilene’s Land Development Code states that, in making a determination regarding a requested zoning change, the Planning and Zoning Commission and the City Council may consider the following factors:

- (1) **Whether the proposed zoning map amendment implements the policies of the adopted Comprehensive Plan, including the land use classification of the property on the Future Land Use and Development Plan Map, as amended.**
 The proposed use is consistent with the Comprehensive Plan.
- (2) **Whether the uses permitted by the proposed change in zoning classification and the standards applicable to such uses will be appropriate in the immediate area of the land to be reclassified.**

The proposed zoning would be appropriate as it would be consistent with the surrounding uses as this will place commercial uses along an arterial intersection.

(3) Whether the proposed change is in accord with any existing or proposed plans for providing public schools, streets, water supply, sanitary sewers, and other public services and utilities to the area.

This property will be subject to platting and site plan review; therefore, any and all utilities that are required will be addressed during that time.

(4) Any other factors, which will substantially affect the public health, safety, morals, or general welfare.

None known.

GENERAL INFORMATION

Article II, Section 32-35 of Chapter 32 of the City Code of Ordinances regulates the sewer rates for persons who are not a user of Abilene's water supply. It has been determined that the Amendment approved by Ordinance 29-2026 did not provide all necessary methods to measure or determine sewer rates pursuant to a written agreement. This proposed Amendment provides three alternative methods to measure or determine sewer rates pursuant to a written agreement, approved by City Council.

Sec. 32-35. Metering of water used for sewer rates.

In the event that any person using the City sewer system is not a user of water supplied by the City, the volume of wastewater discharged by such person shall be measured or determined as follows:

(a) If water used on the premises is measured by a water meter acceptable to the Director of Water Utilities, sewer rates shall be determined by that water usage.

(b) If water used on the premises is not so measured, such person shall install a water meter acceptable to the Director at their own expense, so that the amount of water used shall be metered or otherwise measured or determined by the Director, and sewer rates shall be determined by that water usage.

(c) Notwithstanding subsections (a) and (b), for persons receiving sewer service pursuant to a written agreement for service outside the City limits approved by the City Council under Sec. 32-5, the volume of wastewater discharged into the City's sanitary sewer system shall be measured or determined by one (1) of the following methodologies, as specified in the agreement:

(1) By a water meter measuring water used on the premises, where such water meter is acceptable to the Director of Water Utilities and the wastewater volume is reasonably represented by the water usage;

(2) By a sewer flow meter installed on the customer's wastewater discharge at a location, and of a make, model, and accuracy class, approved by the Director of Water Utilities; or

(3) By a fixed monthly volume calculated using the flow design criteria of the Texas Commission on Environmental Quality, as set forth in 30 Texas Administrative Code Chapter 217 or its successor as approved by the Director of Water Utilities.

The methodology selected under this subsection, and any conditions for changing from one methodology to another during the term of the agreement, shall be set forth in the written agreement approved by the City Council. The Director of Water Utilities is authorized to require any meter installed under this subsection to be compatible with the City's automated metering infrastructure or other reading system designated by the City, and to require periodic calibration and testing of any such meter at the customer's expense.

**Final Reading: Ordinance Amending Section
32-35, "Metering of Water Used for Sewer
Rates"**

Chapter 32 Ordinance Amendment - Background

- Ord. 29-2026 (adopted April 23) authorized outside-City sewer service by written agreement and allowed alternative flow measurement methodologies, including TCEQ-based estimates.
- Direct metering of wastewater is uncommon. Sewage typically flows by gravity through buried mains and is difficult to meter reliably. Most "sewer" billing is actually based on the customer's water meter as a proxy.
- When wastewater is pumped through a private lift station, a flow meter on the pump discharge can produce an accurate reading making true volumetric sewer billing feasible.

What's Changing

- Current 32-35(c) authorizes usage calculation by water meter or TCEQ design methodology, language built around *estimating* flow.
- A sewer flow meter is direct measurement, not an estimate, and isn't covered by the current text.
- Proposed amendment restructures 32-35(c) to expressly authorize three measurement methodologies, selected in the agreement:
 - Water meter (where water usage reasonably represents wastewater volume)
 - Sewer flow meter on the customer's discharge
 - TCEQ flow design criteria
- Adds Director of Water Utilities authority to require AMI (Aclara) compatibility and periodic calibration at the customer's expense.
- Metered sewer is available only by written agreement approved by Council.

Chapter 32 Ordinance Amendment

- No fiscal impact from adoption of this ordinance alone
- Second reading required before ordinance takes effect
- Sewer service agreement with RV park developer to follow upon final adoption

**Approve the Final Reading of an Ordinance
Amending Section 32-35, "Metering of Water
Used for Sewer Rates"**

RE: Opposition to Rezoning Application 5305 Buffalo Gap

Dear Members of the Planning and Zoning Commission,

We would like to voice our strong opposition to the proposed rezoning of the property located at 3035 Buffalo Gap from Single-Family Residential (R-8) to Townhome (TH). As a resident of the Monterrey Circle Development since 2014, we are deeply concerned about the negative impact a change in zoning would have on our neighborhood. For the past fourteen years we have enjoyed a nice, quiet neighborhood with low traffic and noise. The proposed rezoning poses several threats to the continued peace and enjoyment that a single-family residential neighborhood provides.

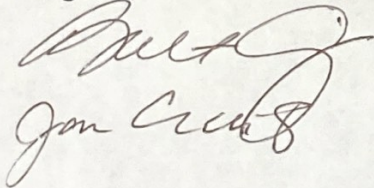

1. A rezoning of this nature would bring a significant increase in traffic. Monterrey Circle is a short, compact and curved street designed to accommodate the use of the 9 houses on it and the traffic that would result from multiple townhomes would create a less desirable place to walk or ride bikes.
2. A rezoning of this nature is not in line with the current use of this neighborhood or the ones in the area. Currently on the west side of Buffalo Gap, the land is primarily single family residential. There are a few commercial properties, a dentist office, real estate office, and an optometrist office. These businesses have not caused a significantly negative impact on the neighborhoods they front. Rezoning the property to townhome is not consistent with the current use of the property or surrounding neighborhoods.
3. Rezoning the property to townhome would negatively impact the property value of our homes. Buyers looking for a quiet neighborhood will be discouraged by a set of townhomes in such close proximity, thus, devaluing our properties. Most home buyers are buying homes to insulate themselves from multi-family housing. Building

townhomes would also change the architectural character of the neighborhood losing the uniform look of a neighborhood with detached homes.

4. The proposed rezoning to townhome is primarily an attempt to capitalize on the housing frenzy in Abilene. This will benefit only the seller and real estate agent of the property, to the detriment of the seven families currently residing on Monterrey Cir. that have invested their time and money caring for the neighborhood and supporting the local economy. People that will rent these townhomes will not have a vested interest in maintaining the area because of the temporary housing environment that townhomes pose.
5. Finally, although temporary, the building of several townhomes on our small street would create a noise and traffic nightmare. The trucks and workers that will be coming in and out of the area will be extremely disruptive to our neighborhood.

We respectfully ask you to refuse the request to rezone this property to townhome allowing this neighborhood to remain a nice, quiet, and inviting place to live.

Regards,

Dear Members of the Commission,

I am writing to formally express my opposition to the proposed rezoning of the property from single-family residential to multi-family residential.

As a resident of this neighborhood, I have serious concerns regarding the potential impacts such a change would have on our community. Foremost among these is the anticipated increase in housing density, which would likely result in a significant rise in traffic volume. The current infrastructure is designed to support single-family use, and additional congestion could pose safety risks—particularly on our small circular street, which presently serves only six single-family homes.

Additionally, a transition to multi-family housing often introduces a higher proportion of rental units. While rental housing plays an important role in the broader housing market, a substantial and rapid shift in the neighborhood's composition may alter its character and long-term stability. Homeownership has traditionally contributed to consistent property maintenance, long-term investment, and a strong sense of community cohesion.

Property values are also a considerable concern. Many homeowners, myself included, have made significant financial investments based on the existing zoning designation. Rezoning to permit multi-family development could adversely affect property values and undermine the investments residents have made in their homes.

For these reasons, I respectfully urge the Commission to deny the proposed rezoning request. Maintaining the current single-family designation will help preserve neighborhood stability, protect property values, and ensure that infrastructure demands remain consistent with existing capacity.

Thank you for your time and consideration.

Sincerely,

Steven Simmons

March 31, 2026

Dear Members of the Planning and Zoning Commission,

I am writing to express my opposition to the proposed rezoning of the property currently designated as single-family residential to multi-family residential.

As a resident and stakeholder in this community, I have significant concerns about the potential impacts this change would have on our neighborhood. First and foremost, increased housing density would likely lead to a substantial rise in traffic volume. Our existing infrastructure is designed to accommodate single-family usage, and additional congestion could create safety hazards, and greatly increase the traffic on our small circle street currently consisting of only six residential single family homes.

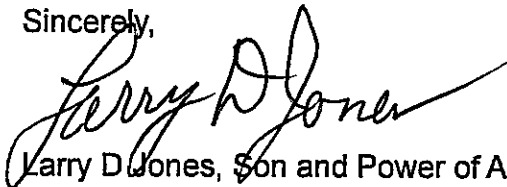

Additionally, a transition to multi-family housing often brings a higher proportion of rental units. While rental housing serves an important role, a sudden shift in the composition of the neighborhood may alter its character and stability. Homeownership has historically contributed to consistent property maintenance, long-term investment, and community cohesion.

Property values are another serious concern. Many homeowners, including myself, have made significant financial commitments based on the current zoning designation. Rezoning to allow multi-family development may negatively affect property values and undermine the investments residents have made in their homes.

For these reasons, I respectfully urge the Commission to deny the proposed rezoning request. Preserving the current single-family designation will help maintain neighborhood stability, protect property values, and ensure that infrastructure demands remain aligned with existing capacity.

Thank you for your time and consideration of this matter.

Sincerely,

Larry D. Jones, Son and Power of Attorney for Nancy Booth Jones Life Est.

Criteria Assessment

Section 1.4.1.4 of Abilene’s Land Development Code states that, in making a determination regarding a requested zoning change, the Planning and Zoning Commission and the City Council may consider the following factors:

- (1) **Whether the proposed zoning map amendment implements the policies of the adopted Comprehensive Plan, including the land use classification of the property on the Future Land Use and Development Plan Map, as amended.**
 The proposed use is consistent with the Comprehensive Plan.
- (2) **Whether the uses permitted by the proposed change in zoning classification and the standards applicable to such uses will be appropriate in the immediate area of the land to be reclassified.**

The proposed zoning would be appropriate as it would be consistent with the surrounding uses.

(3) Whether the proposed change is in accord with any existing or proposed plans for providing public schools, streets, water supply, sanitary sewers, and other public services and utilities to the area.

This property will be subject to site plan review; therefore, any and all utilities that are required will be addressed during that time.
